Part of Paper No. 04072004

Continuation Sheet (PTOL-303) 09/936,721

Continuation of 5. does NOT place the application in condition for allowance because: The applicant's argument with regards to independent claim 29 is unpersuasive. The preamble of the claim, which recites a "urinary diversion system" and provides no limiting structure. Therefore if the body of a claim fully and intrinsically sets forth all of the limitations of the claimed invention, and the preamble merely states, for example, the purpose or intended use of the invention, rather than any distinct definition of any of the claimed invention's limitations, then the preamble is not considered a limitation and is of no significance to claim construction (MPEP 2111.02). Applicant's arguments with regards to the sphincter mechanism and controls means were addressed in the Final Office action.
